

Hearts Creation - Client Operational Manual

Welcome to the definitive guide for managing your premium art boutique, **Hearts Creation**. This document outlines every functionality of your digital platform and provides a step-by-step masterclass on using **Sanity.io** to manage your content.

1. Website Overview

The Hearts Creation website is built on a high-performance **Next.js** framework, synchronized in real-time with your **Sanity Studio**.

Core Sections:

- **Home:** Featuring your signature color-changing cinematic background video and **Featured Artworks**.
- **Shop:** An organized gallery of your creations, filtered by category.
- **About / Studio:** Evocative editorial pages describing the heart of Arunima's laboratory.
- **Contact:** A streamlined interface for bespoke inquiries and studio connection.
- **Patron Reflections:** A curated guestbook where your audience shares their sensations.

2. Managing Content via Sanity.io

Your **Sanity Studio** is the command center of your boutique. Every change made here reflects on the website once "Published."

A. Managing Artworks (artwork)

- **Adding New Art:** Click the **+** icon under "Artworks." Provide a title, slug (URL name), and high-resolution images.
- **Featured Art:** Toggle the **"Featured"** switch to **ON** to display the artwork on the homepage showcase.
- **Availability:** Toggle **"Available"** to **OFF** to automatically mark an artwork as **SOLD OUT** on the frontend.
- **Details:** Ensure you specify the **Price, Size, and Medium** for a premium shopping experience.

B. Organizing the Gallery (category)

- Artworks are grouped by Categories (e.g., Summer Collection 2026, Slice of Life, etc).
- You can create new categories and assign multiple artworks to them to organize your shop.

C. The Guestbook: Moderating Reviews (review)

Important

The Two-Step Approval Protocol:

To protect the integrity of your brand, all reviews follow a strict synchronization protocol:

1. **The Approval Toggle:** Inside a specific review document, you **MUST** switch **"Approved by Admin"** to **ON**.
2. **The Publishing Action:** You **MUST** then click the **"Publish"** button at the bottom of the studio.

Without BOTH actions, the review will remain invisible to your patrons.

D. Strategic Logistics & Address (siteSettings)

Managed via the **Site Settings** (Singleton) document:

- **Shipping Origin:** Update this field (e.g., "Hyderabad") to instantly change the shipping info across all artwork pages and SEO tags.
- **Studio Address:** Manage the primary contact address used in the website footer and contact section.
- **Social Links:** Update your Instagram and other touchpoints globally.

E. Legal & Editorial Content (legal , studioPage)

- Use the **Legal Pages** document to manage your Terms of Service and Privacy Policies.
- Use the **Studio Pages** document to update the narrative content of your "About" or "Laboratory" sections.

3. Best Practices for Excellence

- **Drafts vs. Published:** Changes are saved locally as "Drafts." They will NOT appear on the website until you click the **Publish** button.
- **Image Quality:** Always upload high-resolution **.jpg** or **.png** files. Sanity automatically optimizes these for mobile and desktop performance.
- **Synchronicity:** If changes aren't appearing instantly, ensure you have clicked **Publish** and refreshed your browser.
